

DISCOVER YOUR PERFECT FIT

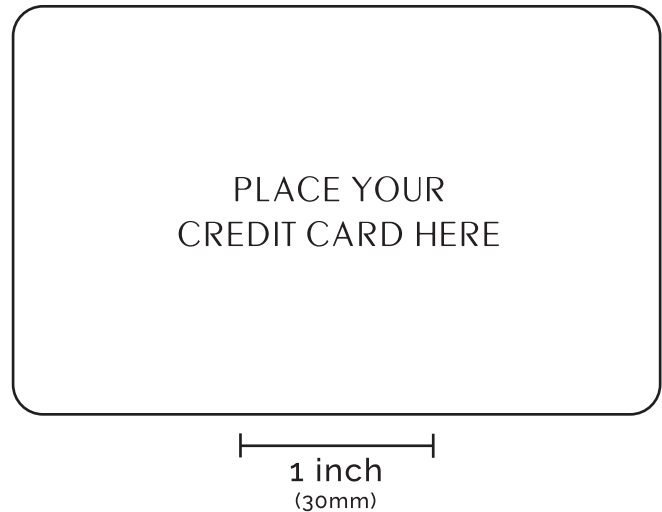

While we encourage you to get sized professionally, this at home tool can serve as a secondary option to help you know what size to order.

FIRST...

PRINT & GRAB A CREDIT CARD

Before printing, ensure Page Scaling is set to 100%.

Once it has printed, please verify your credit card fits in the space provided, OR the bars measure 1 inch. If they do, move to the next step!

METHOD 1: MEASURE AN EXISTING RING

Important: measure the **INSIDE** of the ring

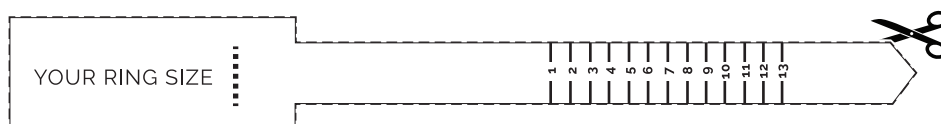

- Choose a ring that fits your finger well
- Using the circles below, place the inside edge of the ring within the circle that fits best
- If the ring fits in between two sizes, order the larger size

METHOD 2:

CUT PAPER & MEASURE FINGER

- Cut out ring sizer below, making a slot by cutting along the bold, dotted line
- Place cut out ring sizer **snuggly around your finger**, numbers facing out
- Your approximate ring size should be the number that appears where it says "your ring size"

STILL NOT SURE?

Stop by any fine jewelry store & have them measure your ring size accurately.

Our rings are final sale & cannot be resized. You are responsible for providing your correct ring size; we cannot be held responsible for a wrongly provided size.
